

Item 7 Please describe the information that is provided in the bills to WebNet from WebNet's underlying carrier(s). Please describe how this information is transmitted to WebNet, either electronically or otherwise. Please describe the form of the information (the nature of any electronic files, the format of paper copies, etc.) Please describe specifically the information provided to WebNet regarding the calls made by WebNet's retail customers, including whether that information included the originating and terminating numbers, and the time and duration of the calls ("call detail").

Answer: WebNet would receive a proprietary electronic file from its underlying carrier that provided routine call detail, BTN, time and date of call, called number and duration of call.

Prepared by: Charles H. Helein, Counsel to Respondent.

Individual competent to testify: M. Howard Lewis, President, WebNet Communications, Inc.

Item 8 Please describe the processing by WebNet of the billing information (described in WebNet's response to Item 6) provided to WebNet by its underlying carrier(s). In particular, describe the processing applies WebNet's rates to the calls made by WebNet's customers). Describe the equipment that WebNet uses for this processing (computers, software, etc.) and whether WebNet owns or leases that equipment.

Answer: WebNet used proprietary software to rate the calls according to its tariffs and then transferred this information via an electronic file to its billing agent. The equipment Webnet used were standard PCs and proprietary billing software. Some PCs are owned, others leased. Billing software is licensed.

Prepared by: Charles H. Helein, Counsel to Respondent.

Individual competent to testify: M. Howard Lewis, President, WebNet Communications, Inc.

Item 10 Please identify all entities, including WebNet, that render bills to WebNet's retail customers on behalf of WebNet. Describe how the information processed by or for WebNet (the information described in WebNet's response to Item 7 or 8) is transmitted to the billing entity (electronically or otherwise) and the form (the nature of any electronic files, the format of paper copies, etc.) of that information. Describe the equipment that WebNet uses for this transmission of this information (computers, software, etc.) and whether WebNet owns or leases that equipment.

Answer: WebNet used an industry billing agent, ILD and after rating its calls according to its tariffs transferred this information via an electronic file to its billing agent. The equipment Webnet used were standard PCs and proprietary billing software. Some PCs are owned, others leased. Billing software is licensed.
